Having issues running `./mp2.sh test all` on Apple Silicon Mac

Hi! I'm using an M1 Mac and followed the instructions to clean and re-pull the Docker image for MP2. I also tried forcing the arm64 version using:

docker pull --platform linux/arm64 ntuos/mp2:latest

The image pulls successfully and says it's for `arm64`, but when I run `./mp2.sh test all`, I get this error:

ModuleNotFoundError: No module named 'pseudo_fslab'

I'm not sure if the image is still missing some files or if I did something wrong. Has anyone else seen this?

Appreciate any help!

在 Mac 環境下，要用 https://cool.ntu.edu.tw/courses/46296/discussion_topics/381980 (https://cool.ntu.edu.tw/courses/46296/discussion_topics/381980) 裡面，助教留言給的

mp2.sh 跑才可以用 ~

同學們好，

如王同學所述，原生並無支援 `arm64`，對此助教已經

- 將 `arm64` 的容器放上 dockerhub，並將 `ntuos/mp2` 設置為支援多平台的 Repository
- 準備好 `arm64` 平台下運行測試框架所需的檔案

請下載附檔並解壓縮，將四個解壓縮出的檔案放置於 `test/` 底下，並用以下命令清除已經下載的 docker image。

```
docker image rm -f ntuos/mp2:latest
```

arm64-so.zip

最後請將 `mp2.sh` 改為以下檔案，其修正了在 mac 上可能遇到的問題。

mp2.sh

便可運行 `./mp2.sh ...` 相關的命令。

助教已經在 macbook M1 和 arm server 上實測過，皆可正常運行。

若同學們還有其他疑問，請不吝提出，感謝大家。

Hello students,

Classmate Yeh's answer is correct. Please use the new mp2.sh script from https://cool.ntu.edu.tw/courses/46296/discussion_topics/381980 (https://cool.ntu.edu.tw/courses/46296/discussion_topics/381980). Thank you.

If you have any further questions, please feel free to ask. Thank you.

Tzu-Ching

不好意思，我在用完 update.sh 後還是沒辦法執行 ./mp2.sh test all，環境是 M3 Macbook Air，錯誤訊息如下

```
Traceback (most recent call last):
  File "/home/student/run_test/test/run_mp2.py", line 4, in <module>
    from pseudo_fslab import interpreter
ModuleNotFoundError: No module named 'pseudo_fslab'
```

Mar 25, 2025

原因應該是因為 update.sh 裡沒有包含到 aarch64 的 library，加進來之後好像就正常了

試試看把update.sh裡的

```
  "test/check_cache.cpython-39-x86_64-linux-gnu.so"
  "test/check_list.cpython-39-x86_64-linux-gnu.so"
  "test/check_slab.cpython-39-x86_64-linux-gnu.so"
  "test/pseudo_fslab.cpython-39-x86_64-linux-gnu.so"
```

改成

```
  "test/check_cache.cpython-39-aarch64-linux-gnu.so"
  "test/check_list.cpython-39-aarch64-linux-gnu.so"
  "test/check_slab.cpython-39-aarch64-linux-gnu.so"
  "test/pseudo_fslab.cpython-39-aarch64-linux-gnu.so"
```
