Hello, I had an issue when i tried to run the test. the orror seemed weird so I tried to take the original version and do the test. I have the same errors and I can't seems to resolve it. And then I saw that all my file were modified due to the way I'm working on the file. I'm cloning the repo, open vscode and the repo, open it whith wls under ubuntu , for mp2.sh I turn it to LF an then i run
chmod +x mp2.sh
./mp2.sh setup
The following resukt is when I do:
./mp2.sh test all

I tried other way to do it but it's the only one which seemed to work. Is the fact that i'm modifying all the file terrible and how can I fix this test bug ?

Have a good day.

Sunday

Maybe it needs ./mp2.sh update to make sure all work properly besides your implementation

The old version(not sure how old) is bad

```
./mp2.sh container [cmd]        Manage the development container:
  start                         - Start the container in the background.
  bash                          - Open a bash shell in the running container.
  finish                        - Stop and remove the container.

./mp2.sh testcase [case]        Run test cases directly (assumes inside container):
  all                           - Run all specification and functionality tests.
  slab                          - Check slab structure design score (partial bonus).
  func <from> [<to>]            - Run functionality tests by number:
                                  - Range: <from> to <to> (inclusive).
                                  - If <to> omitted, runs only <from>.
                                  - If both omitted, runs all (0-24).
                                  - Indices: 0 to 24 (inclusive).
  list                          - Check Linux-style list API usage score (bonus).
  cache                         - Check in-cache fragmentation score (bonus).
  custom                        - Run custom test from 'test/custom/mytest.txt'.
mp2.sh - Command line tool for ntuos2025 MP2 (Last Updated: 2025/03/21)

Usage:
  ./mp2.sh setup                Setup the development environment for this repository.

  ./mp2.sh pull                 Pull the 'ntuos/mp2' Docker image.

  ./mp2.sh test [case]          Run specific public test cases in a volatile container:
    all                         - Run all specification and functionality tests.
    slab                        - Check slab structure design score (partial bonus).
    func <from> [<to>]          - Run functionality tests by number:
                                  - Range: <from> to <to> (inclusive).
                                  - If <to> omitted, runs only <from>.
                                  - If both omitted, runs all (0-24).
                                  - Indices: 0 to 24 (inclusive).
    list                        - Check Linux-style list API usage score (bonus).
    cache                       - Check in-cache fragmentation score (bonus).
    custom                      - Run custom test from 'test/custom/mytest.txt'.
```
