不好意思想請問，將 mp2 push 到 github 後不會自動觸發 github actions 嗎？spec 這段的意思是指說在 3/31 時才會自動觸發一次 github actions，其他時間 push 並不會自動觸發嗎？

> Before the deadline, students may submit their code an unlimited number of times. The assignment will be automatically graded via pre-configured GitHub Actions once at 3/31 00:00:00, which will review the commit history and test results, with outcomes available for viewing on the GitHub Actions interface. Please note that when GitHub Actions completes and displays a green dot, it does not necessarily mean a full score has been achieved. To check your score, please view the details within GitHub Actions.
>
> Final grading will automatically occur one week after the deadline (2025/04/10 00:00:00) and scores will be uploaded. Submissions are still accepted after the deadline (2025/04/03), but points will be deducted based on the number of days late, with a 20% reduction per day, dropping to 0% on the fifth day (2025/04/08). Students can check their final grading results on GitHub Actions after 2025/04/10.
