想請問一下我執行 make qemu 的時候會遇到這個問題，應該要怎麼處理呢?

```
***
*** Error: Couldn't find a riscv64 version of GCC/binutils.
*** To turn off this error, run 'gmake TOOLPREFIX= ...'.
***
gcc    -c -o kernel/entry.o kernel/entry.S
kernel/entry.S: Assembler messages:
kernel/entry.S:12: Error: no such instruction: `la sp,stack0'
kernel/entry.S:13: Error: no such instruction: `li a0,1024*4'
kernel/entry.S:14: Error: no such instruction: `csrr a1,mhartid'

同學您好，這是由於在 user space 中助教使用了 printfslab，但核心並未實作其對應個 system call，故預設無法編譯成功。

6. 在 Repository 內的 `student_id.txt` 檔案中填入同學的學號，例如：

```
b12345678
```

7. 運行 `mp2.sh` MP2 腳本工具：

```
./mp2.sh setup # 進行基本設定
```

   其他使用方式可以使用 `./mp2.sh` 查看。

8. 運行功能測試 (public tests)：

```
./mp2.sh test [case]  # See the appendix for more information
```

   由於模板的程式碼還沒實現 system call，預設編譯將不會通過。
