[MP2] 先push後執行./mp2 update後 commit受限制 (已解決)

我在clone repository後先執行過一次./mp2.sh setup，改完student_id.txt後commit & push

看到公告有新的./mp2.sh，下載下來後執行./mp.sh update後，寫了一些後想要commit，出現下列的警告：

```
$ git commit
Error: Attempting to modify protected file: mp2.sh
Error: Attempting to modify protected file: test/check_slab.cpython-39-x86_64-linux-gnu.so
Error: Attempting to modify protected file: test/pseudo_fslab.cpython-39-x86_64-linux-gnu.so
Error: Attempting to modify protected file: test/gradelib.py
Error: Attempting to modify protected file: test/run_mp2.py
Error: Attempting to modify protected file: user/oap.c
Error: Attempting to modify protected file: user/gah.c
Error: Attempting to modify protected file: user/oak.c
Commit rejected: Cannot delete protected files
FAIL: 1
```

警告中的modified files皆為./mp2.sh update修改的檔案

請問這該怎麼解決？先前push的檔案是否會違反restricted files的規定？

助教 mp2.sh update 的檔案不需要 commit 和 push 上去，被限制是正常的。
你說先前 push 上去的如果只有 student_id.txt 的話沒關係~
